SPOKEN PRODUCTION B1 **SPOKEN INTERACTION** B2

DIGITAL SKILLS

ReactJS / Javascript / Mongodb / Nodejs / Angularjs / Rest api / CSS / Bootstrap / Git / dev ops / nginx / ant design / redux

PROJECTS

GILLA COMPLAINT PORTAL

Gilla is a online complaint Portal.

it consists of three type of users

1. companies

2. users

3. admin

user submits a complaint against any private entity and then company responds and tries

to resolve the complaint

it consist of benchmarking system which rates companies with respect to their complaints resolve, satsfaction rate etc.

we also have a reporting system to better understand companies their progress

gilla also filter out bad complaints

admins call can accept or reject a company/ complaint/ user and much more

https://www.gillaa.com/

CONSTRUCTION COMPANY ERP SYSTEM

Construction companies usually bid on tenders and create offers, we have developed a solution which helps them to automatically get tenders posted by government (Web scrapping). It's a multi role based application, Project manager creates an offer for that tender and after going to multiple persons in flow and at last proposal will be submitted, Once Proposal has been accepted, a project will be created, Risk calculation, Project phases, phase amendments and some other features were included in every project. There was a check and balance mechanism as well, whenever form is updated it has to be approved by authorities to proceed further. From this information there is bunch of analytics for every role of the company (multiple dashboards) CEO, Project Manager, employee, labs etc.
